XM Radio Traffic and weather services are the best I have found. I travel frequently, and the XM service allows me to avoid or be aware of traffic problems or inclement weather. No restriction should be placed on an innovative service that leads the marketplace. Others need to innovate or be left behind. That is capitalism at its finest. Besides, this is a pay service. We deserve to receive the services that the market demands if we are willing to pay for it, and if it does not otherwise contravene the law. The subscribers are not asking for subsidies. Please reject petition 04-160.
Thank you.
